

XCELERATE 26
CONFERENCE

FLUKE

Forging New Connections and Growing New Ideas at Xcelerate

The Fluke Xcelerate Conference is more than just a three-day event. It's a place to gain insights from a vast network of experienced professionals, from CEOs to maintenance technicians, with one thing in common: they're all building resilience into their day-to-day operations by partnering with Fluke.

Meet faces you're already familiar with, like your Customer Success Manager, and make new connections with peers across industries who face the same challenges as you. Share meals, engage in thoughtful discussions, and build networks that span beyond the event and fuel future opportunities to collaborate.

At Xcelerate, you'll:

- ✓ **Connect** with maintenance and reliability leaders to share knowledge, tactics, and ideas.
- ✓ **Engage** in thoughtful roundtable discussions with peers.
- ✓ **Experience intimate fireside chat discussions** with respected global maintenance and reliability experts.
- ✓ **Enjoy inclusive meals and entertainment** to foster valuable relationships.
- ✓ **Hear real-world case studies** and broaden your network with peers who've faced obstacles similar to your own.

Discover what networking at Xcelerate looks like:

Case Study: Johns Hopkins Radiology

At the 2025 Xcelerate Conference, Madison Williams, System Administrator at Johns Hopkins Radiology, connected with peers and her Customer Success Managers. Through networking and learning, she built lasting relationships and discovered new strategies to boost efficiency across Johns Hopkins Radiology's seven facilities.

The Opportunity

Johns Hopkins Radiology is a world-renowned medical treatment and research center. The institution has used eMaint since 2023 to achieve 92% uptime and standardize maintenance across its seven facilities.

At the 2025 Xcelerate conference, Madison Williams, System Administrator at Johns Hopkins Radiology, looked forward to forging new connections and strengthening existing relationships. Williams also anticipated discovering innovative ways to further leverage eMaint for Johns Hopkins Radiology's operations by gaining new insight from peers.

The Experience

Xcelerate 2025 gave Williams the chance to connect face-to-face with her long-time Customer Success Managers, Carlos and Jason. "It's so nice to see the people I've been working with since go live," she said. "I'm really happy to meet them in person."

Besides meeting her CSMs, Williams picked up new tips and ideas shared by peers on improving eMaint workflows and using integrated features like vibration monitoring. She left the conference excited to apply what she learned at Johns Hopkins Radiology facilities.

The Impact

Williams forged valuable connections and gained fresh insights into optimizing eMaint dashboards for even better productivity. These new relationships and innovative ideas about leveraging Azima AI wireless vibration monitoring inspired Williams to make an even greater impact at Johns Hopkins Radiology.

"I've gotten to rub shoulders with other people who use eMaint. I'm learning, but I'm networking as well," she said. "Xcelerate gave me that chance to not only meet the people I've been partnered up with on the eMaint account for Johns Hopkins Radiology, but also to explore what's to come with eMaint."

"Xcelerate gave me that chance to not only meet the people I've been partnered up with on the eMaint account for Johns Hopkins Radiology, but also to explore what's to come with eMaint."

Madison Williams, System Administrator, Johns Hopkins Radiology
