Speaker Introductions

Tara Acree

Tara Acree is an enterprise account executive for the life sciences and automotive industries at eMaint, a Fluke Reliability company. She specializes in SaaS-based solutions and hardware tools across enterprise platforms, focused on a best practices approach.

Roy Rothwell

Roy Rothwell is the director of customer success, EMEA, for eMaint and Fluke Reliability. His customer services team provides unrivaled support in implementation, consulting, training, customer success management and helpdesk support.

About Us

- Subsidiary of Fortive, a diversified industrial technology conglomerate
- **Part of Fluke Corporation #1 in the world Industrial Precision Measurement**
- **eMaint CMMS 35 Years on the market, Serving maintenance & reliability leaders 70,000 customers**
- Dedicated Life Sciences Team

Introduction

We will discuss changes, challenges, and industry trends along with best practices on how Life Science companies can:

Comply with regulatory requirements

Mitigate risk and provide world class metrics

Automate digital processes to reduce manual methods

Includes an overview of proven steps to comply with FDA, GMP, and other regulatory practices while enhancing maintenance strategies to improve efficiency and visibility.

Audience Poll

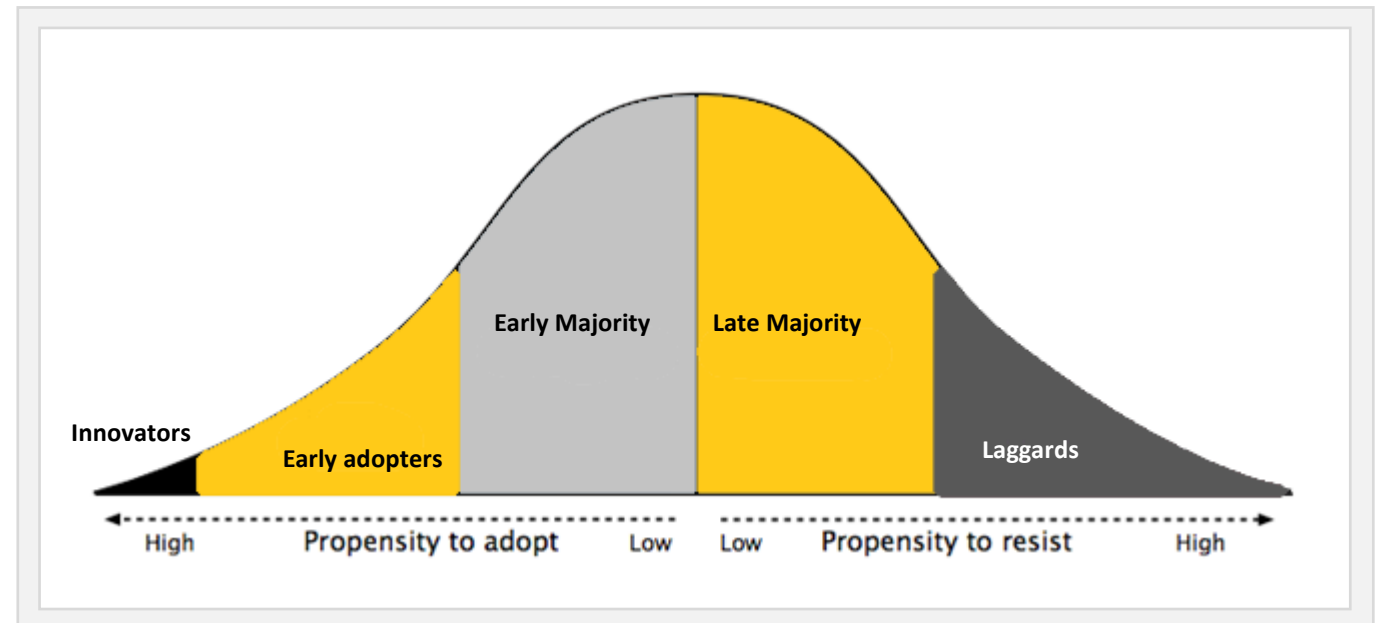

What are you currently using to manage the maintenance on your equipment?

- A. Nothing
- B. Paper
- C. Homegrown system
- D. CMMS
- E. Validated CMMS

Traditional Life Sciences and New Technologies

Traditionally Manual Methods: Paper & Excel

- Costly to implement new processes
- Data Integrity
- Cyber Security
- Training & Skills Sets

Reasons for Change

1990
Pharma industry requests guidelines from the FDA for **electronic records and signatures**

1992
(February) Working group recommends publication of **ANPRM** to obtain public comment

(July) FDA publishes ANPRM and receives **53** comments

1997
(March) FDA publishes **21 CFR Part 11 Final Rule**

(August 20th) Part 11 goes into effect

2002
FDA announces modernization initiative, **Pharmaceutical cGMPs for the 21st Century – A risk-Based Approach**

2010
FDA announces intent to conduct inspections focusing on 21 CFR 11 requirements relating to **human drugs**

1991
The FDA creates **Task Force on Electronic Identification / Signatures** to develop a uniform approach by which the FDA could accept electronic records and signatures for **all regulated activities**

1994
FDA publishes proposed rule in the **Federal Register** and receives **49** comments

1999
FDA publishes a **Compliance Policy Guide (CPG)** and drafts **five guidance docs**

2003
(February) The FDA **Revokes CPG 7153.17**, the enforcement policy and the **Part 11 guidance documents**

(August) FDA publishes new Guidance for Industry – **Part 11, Electronic Records, Electronic Signatures – Scope and Application**

Why do we do this?

- Goal of regulators is to ensure the safety and quality of products for the consumer.
- Audits and inspections are meant as a safeguard for the overall public health

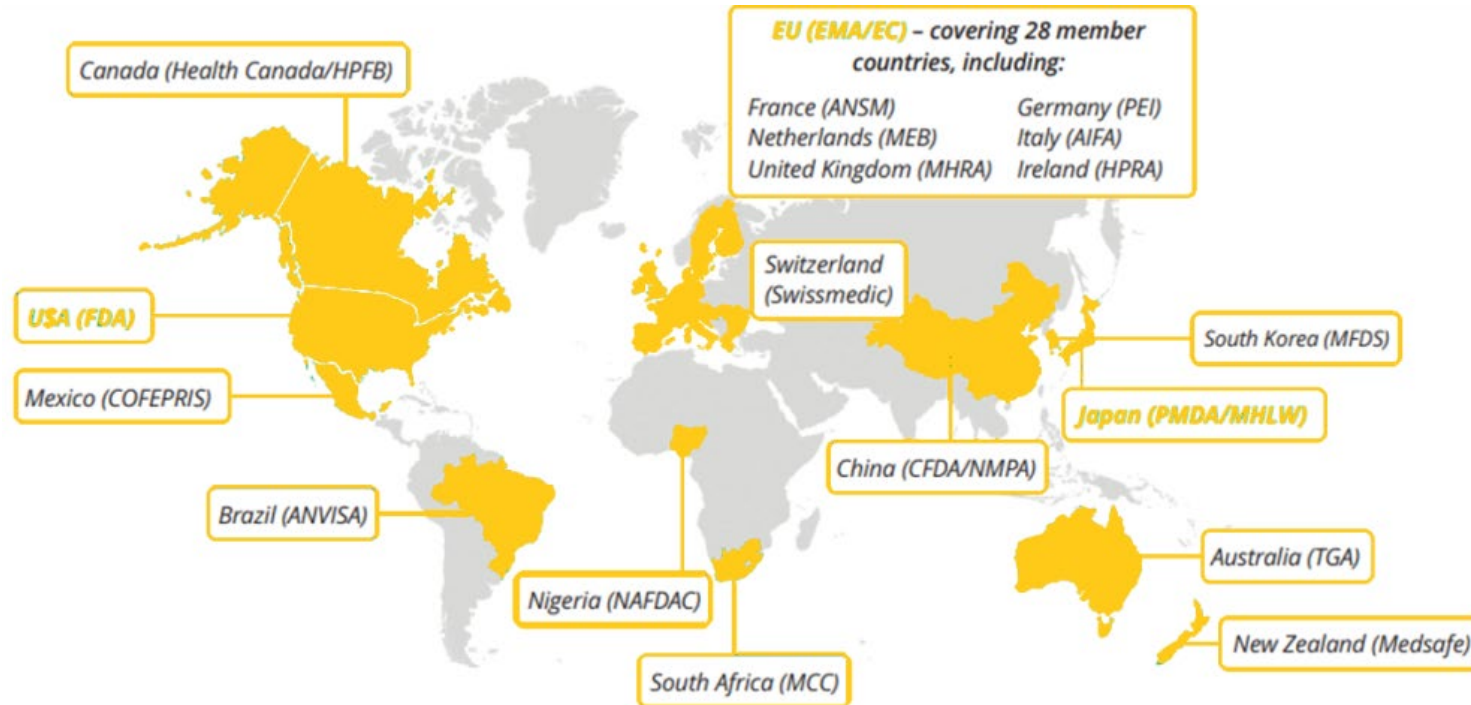

What are the Challenges?

- Variance in regulatory Standards - Different standards around the world
- Increase demand for Digital Documentation
 - Early 1990s introduction to 21 CFR Part 11 Compliance 1991-Electronic Records and Signatures
 - 2002 publication *Pharmaceutical cGMPs for the 21st Century – A Risk-Based Approach*, was created to encourage adoption of new technological advances and implement risk-based approaches
 - 2018 Canada and United states use a Common electronic submission gateway to ensure inspection schedules on equipment and labs

Regulatory Organizations Worldwide

United States (FDA) Food and Drug Administration	European Union (EMA and EC) European Medicines Agency / European Commission	United Kingdom (MHRA) Medicines and Healthcare products Regulatory Agency

		Australia (TGA) Therapeutic Goods Administration

What is 21 CFR Part 11 & Eudralex

21 CFR Part 11 and EudraLex Annex 11 compliance focus on **five critical areas**:

Impact of regulations on the client's computer systems, including Quality Management Systems

1

Identification of the client's computer systems and operating environment

2

Review and consideration of client procedures

3

Analysis of procedural documentation, validation, and audit data

4

Regulatory significance of the computer systems

5

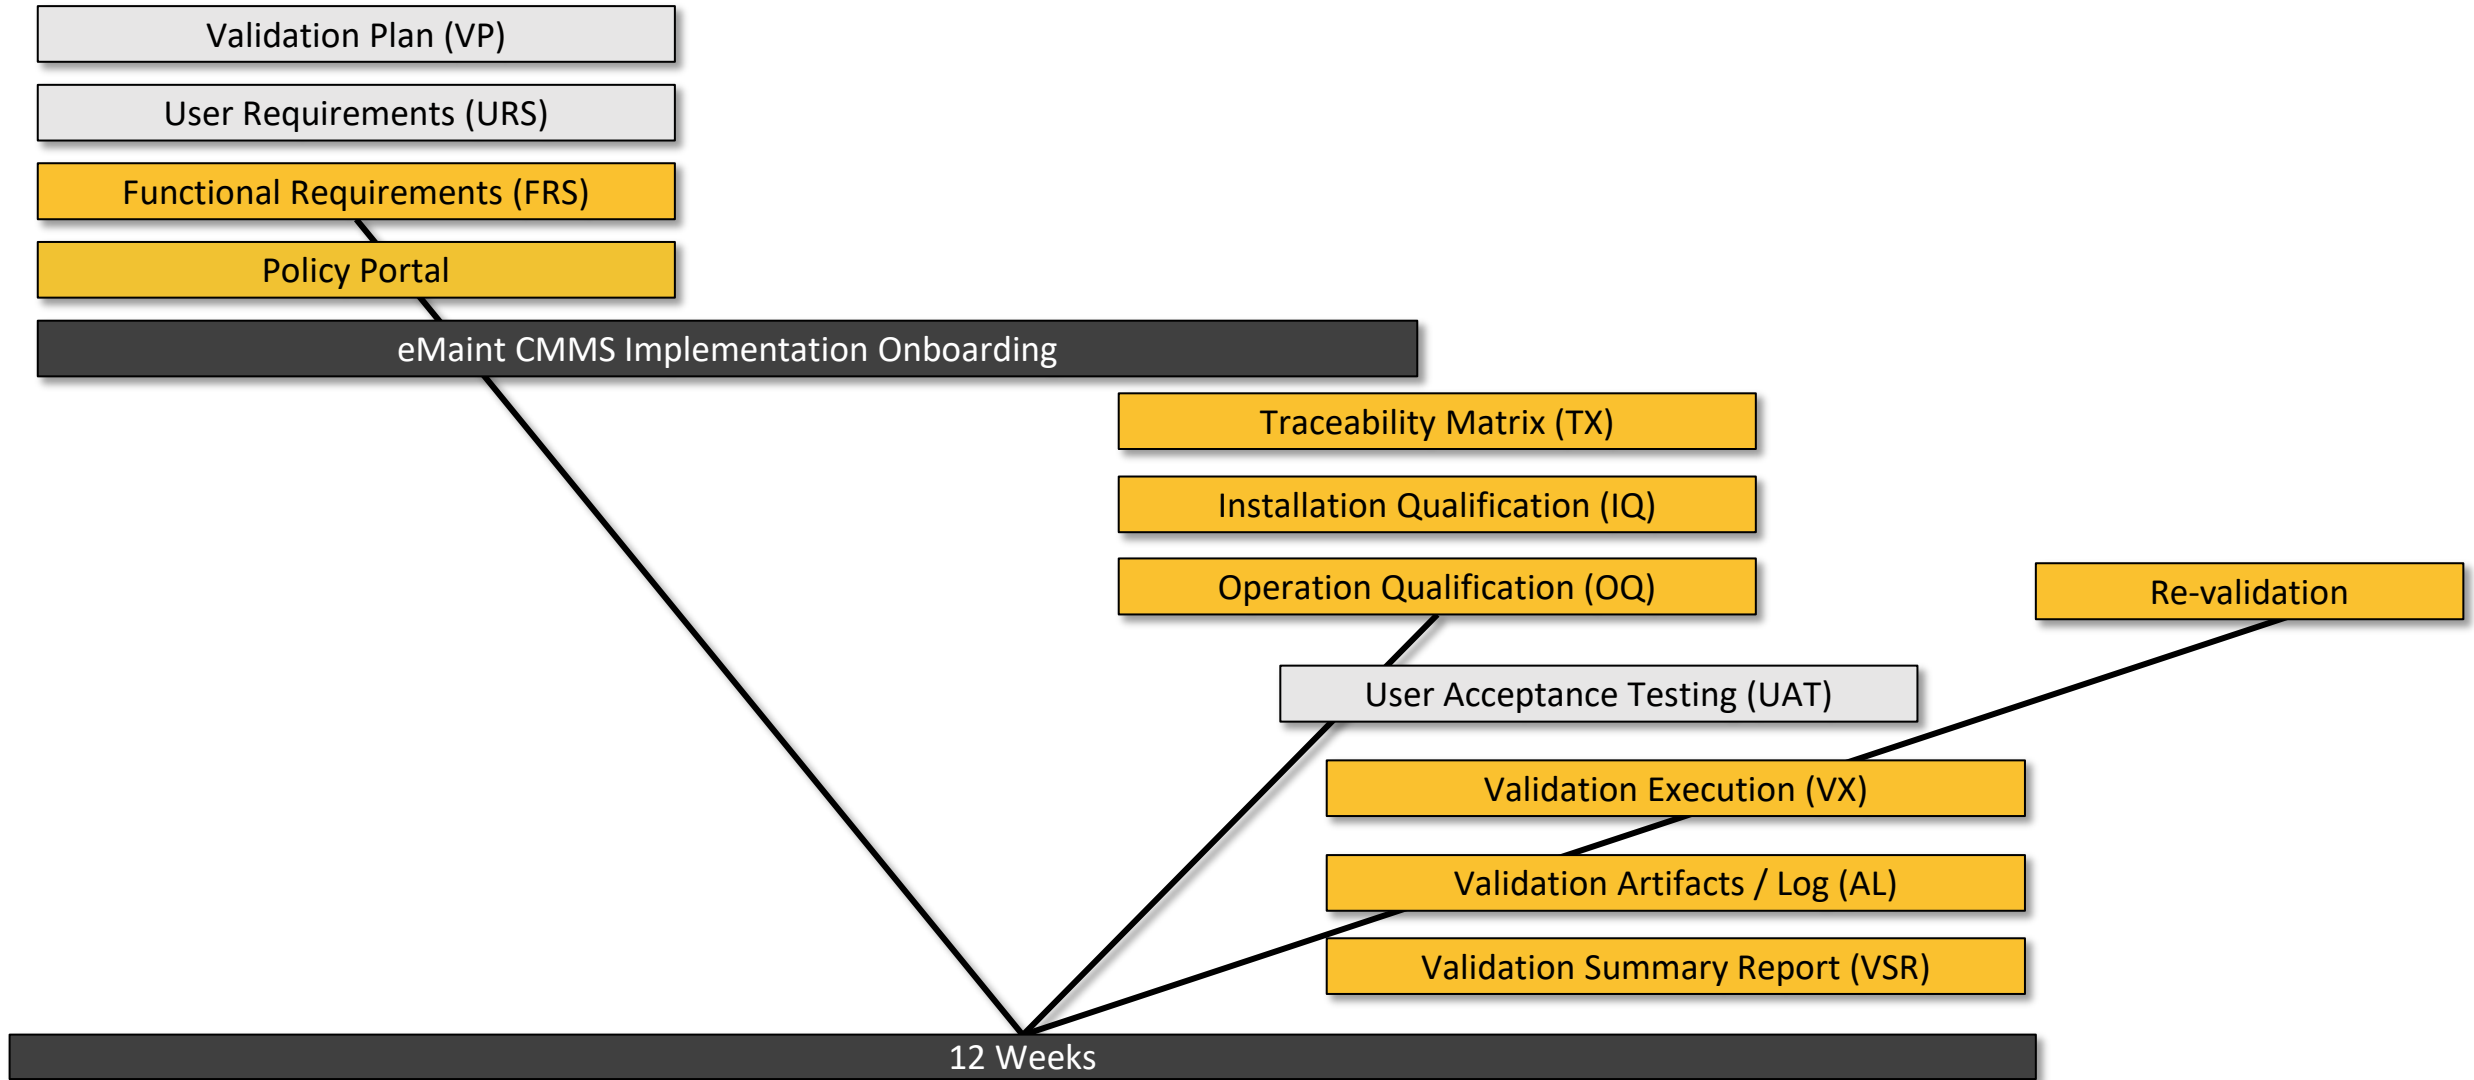

Compliance - Buzzword Bingo!

Ways Technology Can Help

Using a CMMS to increase competitive advantage and ROI in the industry

Sandbox Testing of software

Paperless Records

Accountability

Holistic and Consolidated View of Data

Audit Trail

Electronic Signature sign off

Using KPIs and Metrics to extract more information from new and historical data in order to interpret data for insightful business decisions and improvements.

Standardize data to improve visibility from corporate perspective

Improved metrics for increased demand for quality metrics from customers, auditors, an operations

Paperless Records

Paperless processes improve competitive advantage by:

- Improved authenticity and quality of data
- Reduce data entry time improving efficiency of staff and production
- Quicker response times to failures and quality reviews
- Failure mode effects analysis for predicting future issues and improving equipment reliability

Accountability: Electronic Signature

Authorization required  

Password

Reason Code

Reason Text

Hint: The maximum length is 1000 characters

Compilation of electronic data that is as unique and legally binding as a handwritten signature but is used to sign records in a computer system.

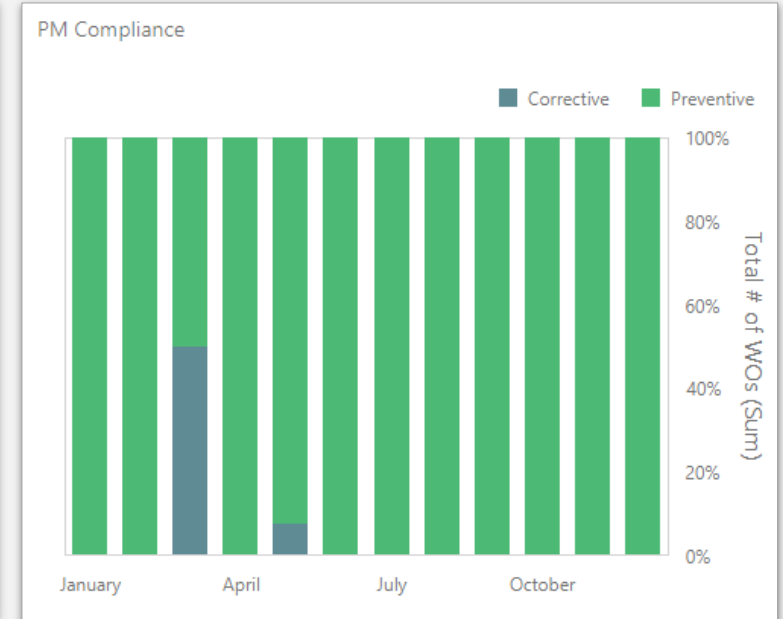

21 CFR Part 11 on electronic signatures:

- Organizations must **adopt sound business practices** by ensuring signatures to be accurate, reliable, confidential, authentic, trustworthy, and **equal to paper and handwritten signatures.**

E-Signature

Define configuration settings for e-signature.

Using a CMMS to increase competitive advantage and ROI in the industry

Holistic and Consolidated View of Data

- The ability to interpret data for insightful business decisions and improvements based on new & historic trends
- Standardize data to improve visibility from corporate perspective
- Provide historical analysis to satisfy increased demand for quality from customers, auditors, and operations

Audience Poll

Which *element?* of CMMS that increases competitive advantage and ROI would you perceive as most *helpful? relevant?* for your organization?

- A. Sandbox Testing of software
- B. Paperless Records
- C. Accountability (Audit trail, e-signature sign off)
- D. Holistic and Consolidated View of Data

In Summary

Changes in regulatory standards and increased demand around the world have caused strict demands from companies on:

- Digital Documentation
- Accountability & Quality reviews
- Paperless record keeping
- World Class Metrics

21 CFR Part 11 allows companies guiding regulations ensure the safety and quality of products for the consumer via:

- Audit Trail
- Electronic Signature Sign Off
- System Validation
- Maintaining the validated state

**Let us know if you would like us
to follow up with you.**

- A. Please call me- I'd like to learn more!
- B. Please send me educational materials via email
- C. This was great, but I don't need any more information at this time.
